

EVOLUTION OF MANAGEMENT

EVOLUTION OF MANAGEMENT THOUGHT

```
graph TD; A[EVOLUTION OF MANAGEMENT THOUGHT] --> B[PRE-SCIENTIFIC MANAGEMENT PERIOD]; A --> C[CLASSIC THEORY]; A --> D[NEO CLASSIC THEORY]; A --> E[MODERN THEORY];
```

PRE-SCIENTIFIC MANAGEMENT PERIOD

- Roman Catholic Church
- Military Organizations
- Writers like Charles Babbage James Watt etc

CLASSIC THEORY

- Scientific Management
- Administrative Management Theory
- Bureaucratic Model

NEO CLASSIC THEORY

- Hawthorne
- Experiment

MODERN THEORY

- Systems Approach
- Contingency Approach

EVOLUTION OF MANAGEMENT THEORIES

I. Classical Management Theory (1880-1930)

1. Scientific Management by F.W Taylor.
2. Administrative Management by Henri Fayol.
3. Bureaucratic Management by Max Webber.

II. Neo Classical Management Theory (1930-1950)

1. Human Relations Movement
2. Behavioral Sciences Movement

III. Modern Management Theory (1950 Onwards)

1. Quantitative Approach
2. System Approach
3. Contingency Approach

PRE-SCIENTIFIC MANAGEMENT PERIOD

Professor Charles Babbage – United Kingdom (1729 – 1871)

Prof Babbage, a renowned professor in mathematics at Cambridge University discovered that manufacturers **were relying on guesswork** and suggestions and urged them to utilize mathematics and science to be more accurate and productive.

Robert Owens – United Kingdom (1771 – 1858)

Robert was regarded as the father of personal management because of his approach and **focus on employee welfare**. He encouraged the training of workers, education for their children, canteens in the workplace, shorter working hours, among others.

CLASSICAL THEORY

- ✓ The beginning of the science of management started in the last decade of the 19th century.
- ✓ Names like Emerson, F.W. Taylor, H.L. Gantt and others were the key contributors.
- ✓ It also was closely related to the industrial revolution as well as the rise of large-scale enterprise.

During the classical period, management thought was focused on

- ✓ Job content
- ✓ Standardization
- ✓ The division of labor
- ✓ Scientific approach towards organization.

SCIENTIFIC MANAGEMENT

Henry L Gantt

Scientific Management

- **Frederick W. Taylor**(Chief engineer in Bethlehem Steel Company, USA) – **father of scientific management.**
- According to Taylor, **Scientific management is an art of knowing exactly what you want your men to do & seeing that they do it in the best & cheapest way**

PRINCIPLES OF SM

1. Replacing rules of thumb with science.
2. Achieving cooperation of human beings.
3. Working for maximum output.
4. Developing all workers to the fullest extent possible for their own and their company's highest prosperity.

STEPS IN SCIENTIFIC MANAGEMENT

1. Analyze the work scientifically.
2. Divide work & responsibility.
3. Select workers best suited to perform specific tasks.
4. Provide guidelines for worker performance.
5. Achieve support from workers.

TECHNIQUES OF SM

1. Scientific study and planning of work.
2. Scientific selection, placement and training.
3. Standardization of raw materials, machines and working conditions.
4. Division of responsibility b/w managers and workers.
5. Wage incentives.

CRITICISM IN SM

1. Unrealistic assumption that worker is a economic man.
2. Workers are considered as a factor of production which is lifeless.
3. Close supervision and control causes work stress in employees.
4. Focused on production maangement

CONTRIBUTIONS OF F W TAYLOR

- Taylor pioneered the **time & motion study**.
- Taylor advocated scientific study of the task – which led to the concept of **scientific management**.
- Another concept of Taylor was '**A Fair Days Task**'
- The concept of **functional organisation** was suggested.
- Taylor suggested a wage incentive scheme known as '**Taylor's Differential Piece Rate Plan**'.

CONTRIBUTIONS OF GANTT

- He improved Taylor's 'Differential Piece Rate System' & brought out his '**Task and Bonus Plan**'
- Gantt developed the daily balance chart, now known as the **Gantt Chart**

Gantt Chart

Task Name	Q1 2019			Q2 2019		Q3 2019
	Jan 19	Feb 19	Mar 19	Apr 19	Jun 19	Jul 19
Planning						
Research						
Design						
Implementation						
Follow up						

Henry L Gantt

CONTRIBUTIONS OF GILBERTH

- **Time study** -It is direct observation of a task, using a time keeping deice(stop watch, video camera etc.) to record the time taken to accomplish a task.
- **Motion/Method study** – It is the analysis of work motion, consisting in part of filming the details of a worker's activities and their body posture while recording the time.

FRANK GILBRETH

THERBLIGS

- It divides the human activities into micro-motions called **Therbligs**.

MICRO-MOTION STUDY

➤ *Therbligs*

NEO CLASSICAL MANAGEMENT THEORY (1930-1950)

Emphasis on human and social factors of industry

1. Human Relations Movement/School
2. Behavioral Sciences Movement/School

HUMAN RELATIONS MOVEMENT

- ✓ Founder-Elton mayo in 1930s
- ✓ Focused more on inter personal relations.
- ✓ Hawthorne experiment at Western electric company,USA
 - ✓ Study concluded that production efficiency of workers depends upon emotional factors as well.

HAWTHORNE EXPERIMENT

The original purpose of the Hawthorne studies was to examine how different aspects of the work environment, such as lighting, the timing of breaks, and the length of the workday, had on worker productivity.

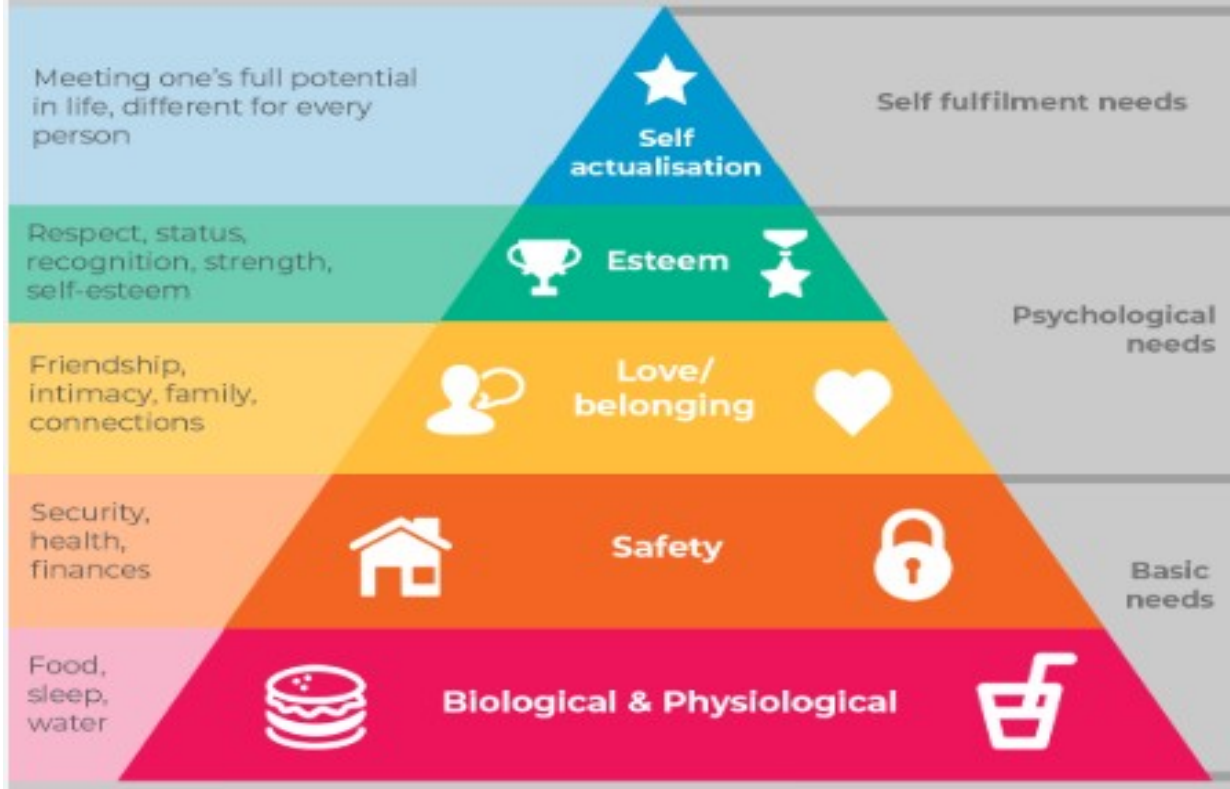

1. Experiments on Illumination
2. Relay Assembly Experiment (Breaks)
3. Mass Interviewing Program
4. Bank Wiring Observation Room (Group)
5. Personnel Counseling

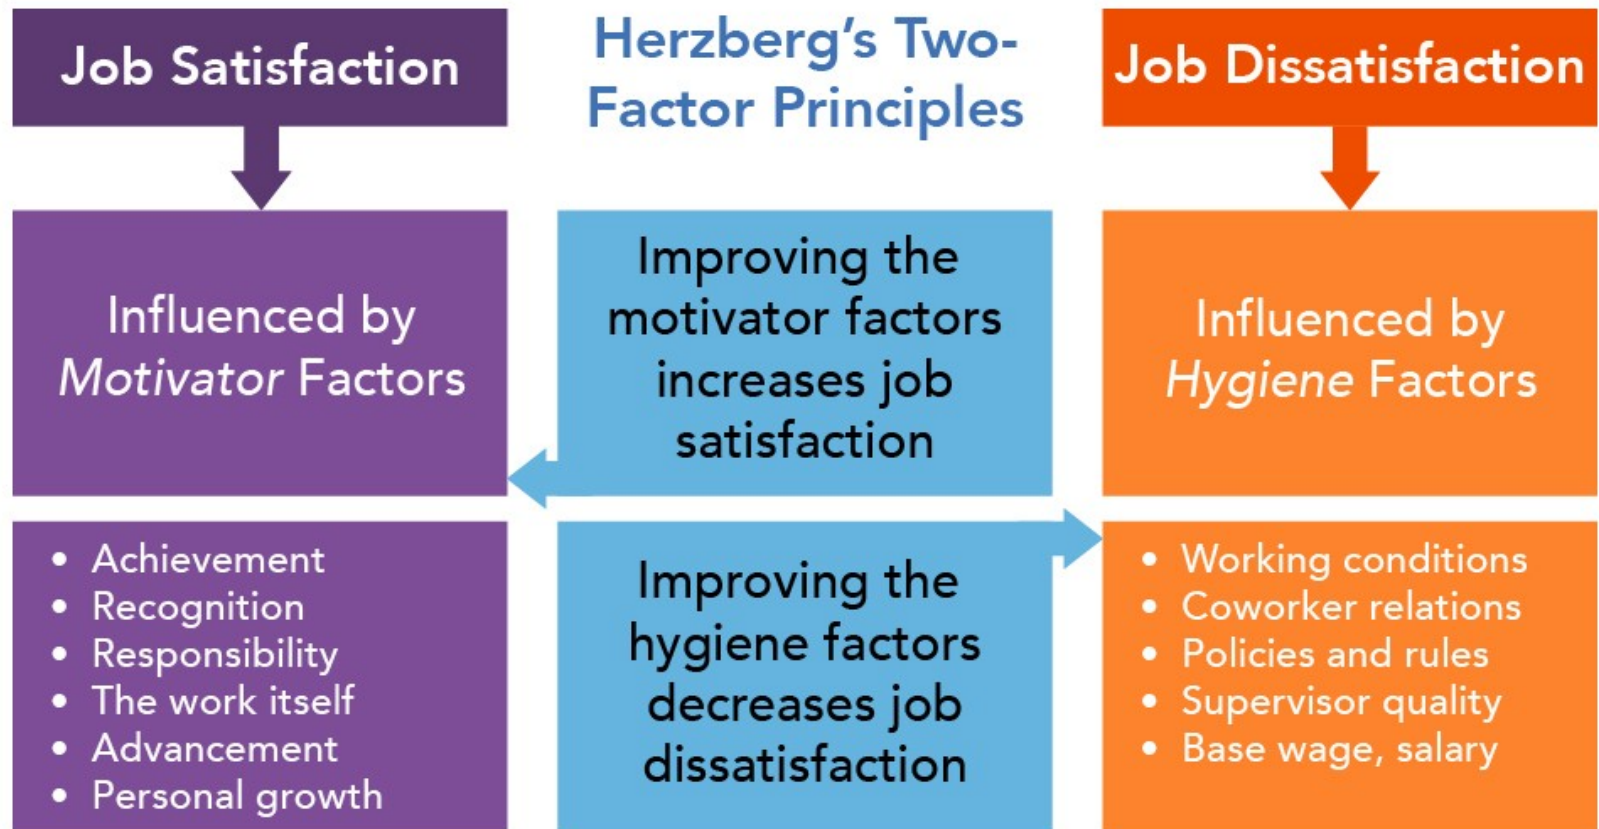

BEHAVIORAL SCIENCES MOVEMENT

Focused on human behavior

- ✓ Maslow need hierarchy theory
- ✓ Herzberg 2 factor theory
- ✓ Mc Gregor theory X and theory Y

MASLOW'S HIERARCHY OF NEEDS

McGregor Theory of X and Y

Theory X Manager beliefs

- Employees **dislike work**, avoid responsibility.
- Emphasis on continuous **monitoring and supervision**
- **Rewards or Punishments** are used for motivating employees. Management believes employees work is based on their own self-interest.
- **"We vs They"** relation between management and employees.

Theory Y Manager beliefs

- Employees are self motivated, **enjoys their work**, and ready to take more responsibility.
- Believes that employees can work **without supervision**.
- Giving **more responsibility**, and empowering to take decisions are used for motivating employees.
- **Collaborative** and **cordial** relations between management and employees.

MODERN MANAGEMENT THEORY

1. Quantitative approach
2. System approach
3. Contingency approach

Systems Approach

A systems approach to management is meant the study of a firm in its totality so that the men and material resources of the firm can be organized to realize the firm's overall objectives as efficiently as possible.
